HOW TO PERFORM TOYOTA SMART CONNECT SOFTWARE UPDATES – VIA OVER–THE–AIR UPDATES (OTA)
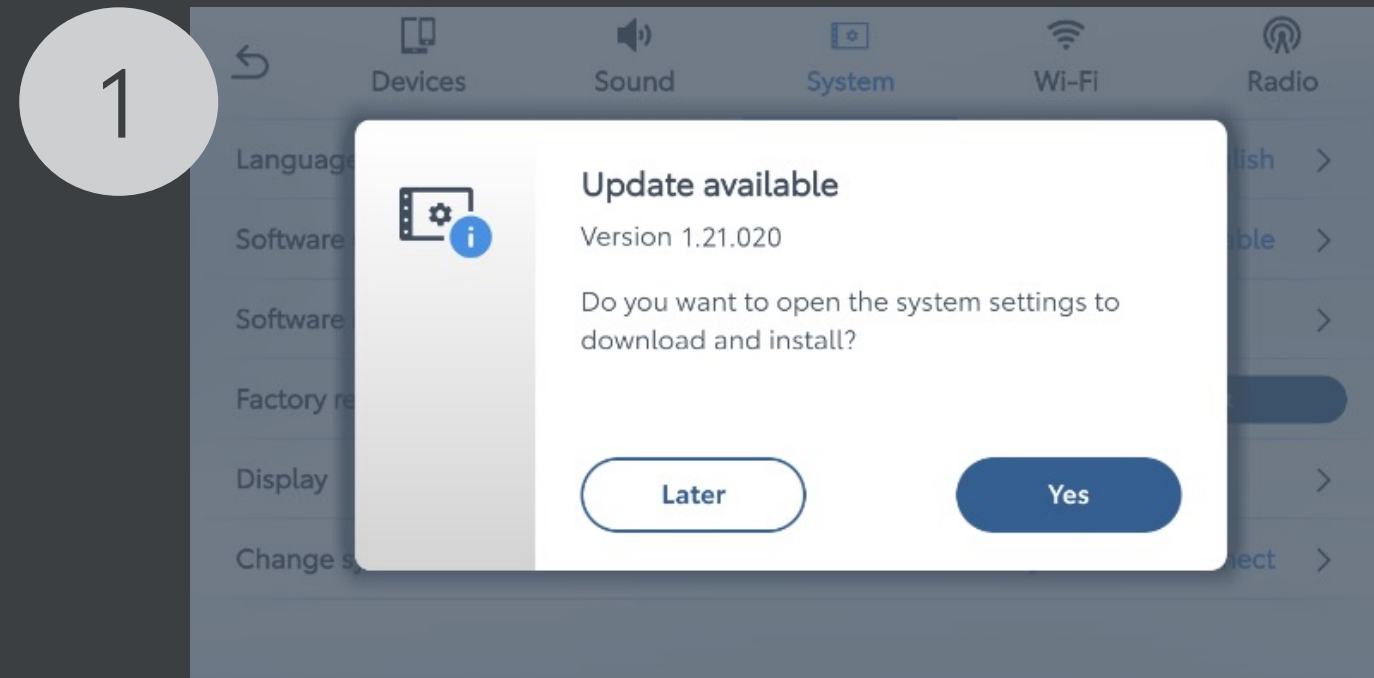

(APPLICABLE TO 2021 YARIS CROSS AND 2022 AYGO X)
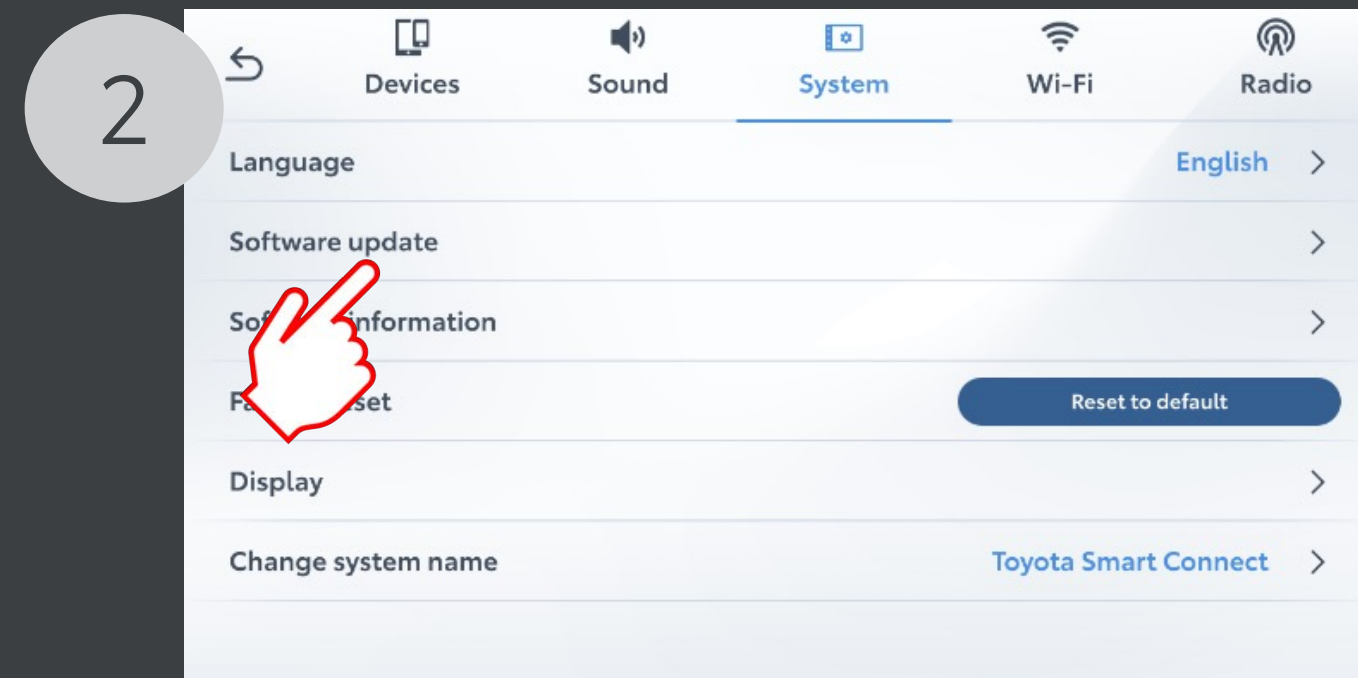

MyT | Connected Services

OVER-THE-AIR UPDATE

Toyota Smart Connect supports Over-The-Air software updates to ensure the device is up to date with latest features and improvements.
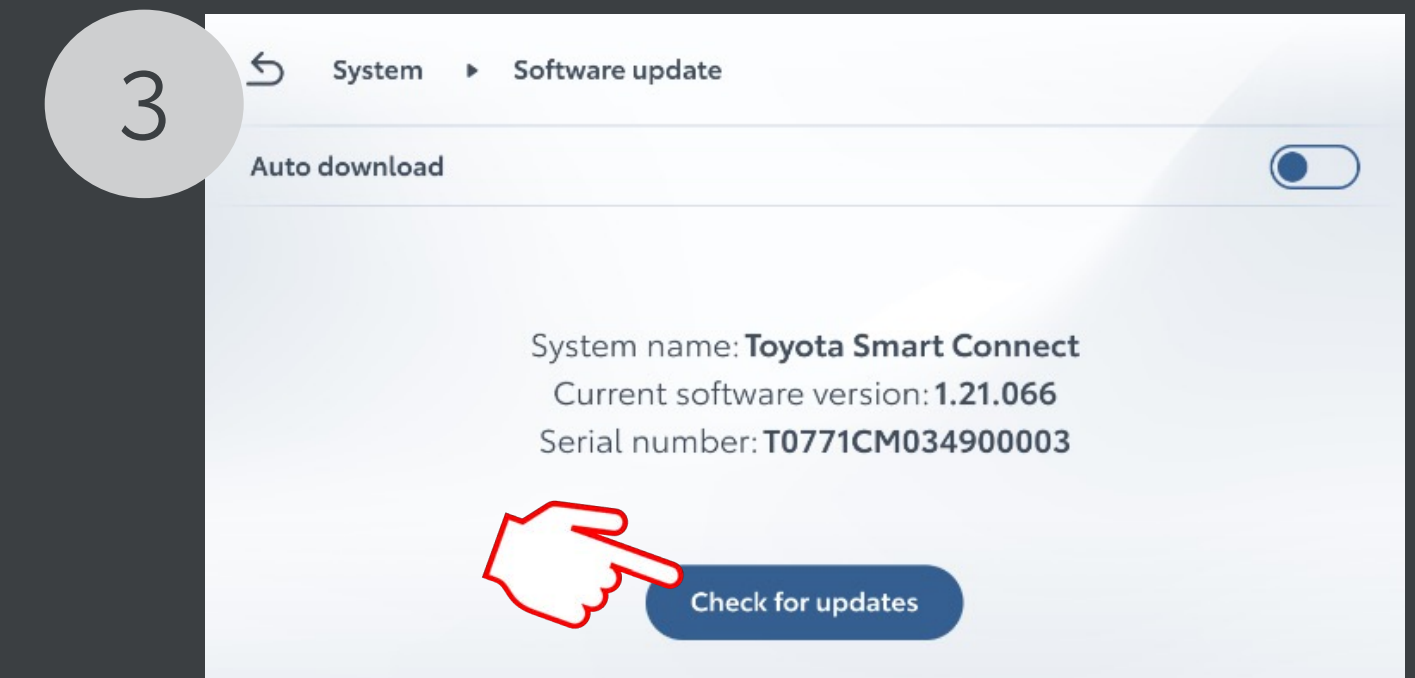

1

The system will automatically check for updates once per week. When a new update is available, a popup will be shown.
Press "Yes" to proceed to the software update menu to start the installation. To postpone the update, press "Later".
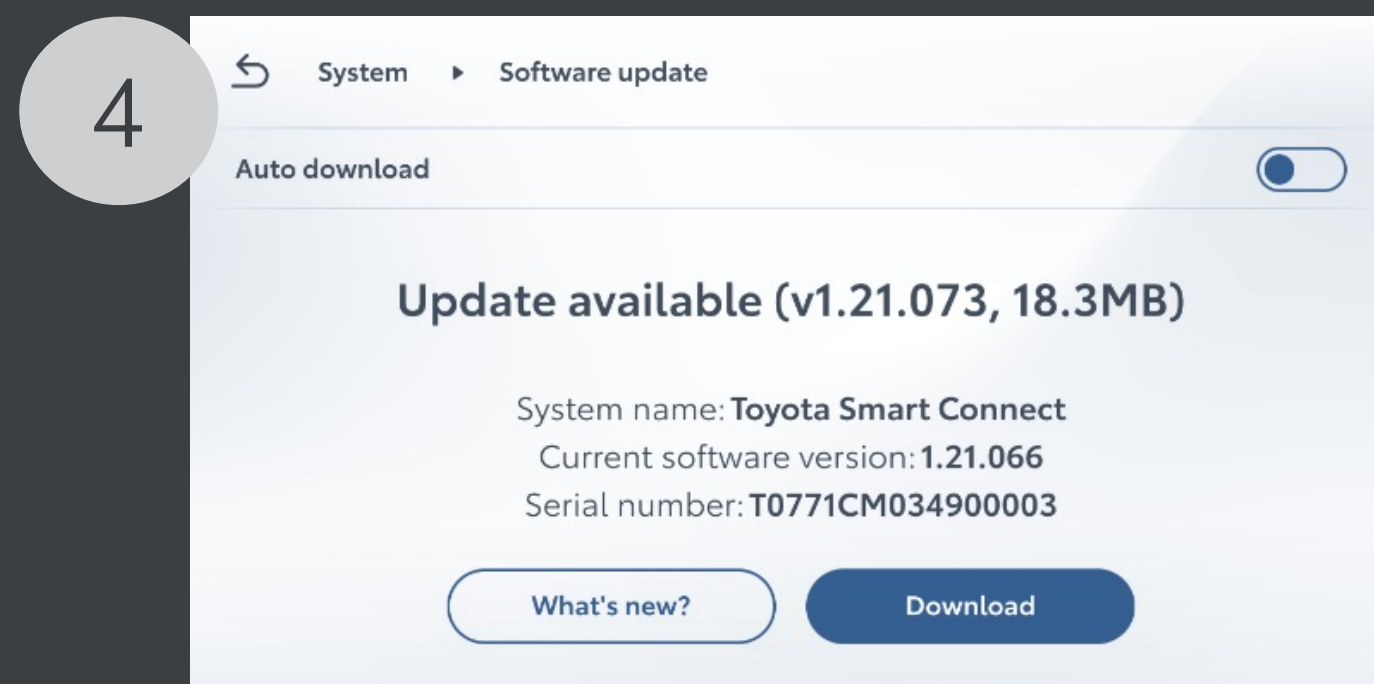

2

To check for software updates manually, follow the next steps:
1. Access settings, by touching the ⚙ icon on the HOME screen.
2. Touch the tab "System"
3. Touch "Software update" to access the software update screen.

3

Touch "Check for updates"

4

Before installing the software update, the software package must be downloaded.
If a software update package is available, following screen will be displayed.
Touch "Download" to start the downloading the software update.

5

When the software update has been downloaded, this screen will be displayed.
Touch "Install now" to start the installation process of the software update.

NOTES

o The ignition needs to be ON to start the software installation.
o Do not turn off the engine during the software update to avoid draining the vehicle battery
o During the installation, the system cannot be used. The installation takes around 10min. This may vary based on the update content. After installation, the system will restart.
o If you experience problems performing this update, please contact your dealer for support.
